Care

TactSleeve is an electronic device and is not washable. Never wash the main device under any circumstances. If it becomes dirty, gently wipe it with a soft cloth or tissue.

The inner lining may be removed and machine washed with neutral detergent. Do not use strong chemicals or strong detergents.

Store

Do not drop the device and avoid leaving it folded or creased. When not in use, place the product in its original packaging.

Audio-to-Haptics (Wireless)

For Non-Natively Supported Content
Windows 10, 11

You can enjoy content that doesn't natively support TactSleeve by using the Audio-to-Haptics feature in bHaptics Player for PC, which automatically generates haptic feedback based on the audio of the content.

Specifications

Product Name	TactSleeve
Model Name	BHTA03M1D
Feedback Point	3 (each)
Size	One-size-fits-all

*measured when all feedback points operate at maximum intensity for 1 second every 5 seconds

Developers

<https://bhaptics.com/support/developers>

We offer specialized tools that make it easy and straightforward for developers to create natively supported content.

A web-based haptic authoring tool that allows users to create and customize haptic feedback patterns. <https://designer.bhaptics.com>

A web-based tool that defines content-specific event scenarios and assigns haptic patterns to be delivered when those events occur. <https://developer.bhaptics.com>

SDK

A Software Development Kit designed for easy and swift integration of haptics into content.
